

ICD-9-CM log of changes (Changes from FY2006 Casefinding list and forward)

The updated Casefinding and Supplemental list from SEER was released on 04/09/2009. The casefinding list identifies all diagnoses and types of cases to be screened for inclusion in the cancer registry database. Below is a log of changes that were incorporated since the Casefinding and Supplemental list was released in October 2006. Several of the codes were added from the 2007 and 2008 updates. Other codes were added to incorporate more diseases that are associated with cancer (many of these were added to the supplemental list) and became effective in previous years.

Please go to: <http://seer.cancer.gov/tools/casefinding/index.html> to review the current Casefinding and Supplemental List.

The current Casefinding and Supplemental list is for Fiscal Year (FY) 2009, which became effective October 1, 2008. Codes are listed as being either R (Reportable) or S (Supplemental).
