The other first-place Delta Omega poster winner is Mirandy Li, seen here with one of her favorite partners in crime, Coco! Mirandy's work, entitled Minority Stress among LGBTQ Smokers in the Deep South: A Mixed Methods Study, was something near and dear to her heart.

"The LGBTQ community is very important to me. Minority stress, mental health, and smoking disparities disproportionately impact LGBTQ folks, so I wanted to address these health inequities in my dissertation," Mirandy tells us.

Congrats to her and her co-writers (Holly Mayeaux, Jackson Fritz, Gabrielle Gonzalez, Stephen Phillippi, Qingzhao Yu, Edward Trapido, Michael Celestin, Tung Sung Tseng) on your award-winning work!

To round out our week of the favorite classes offered here at LSU School of Public Health, we spoke with Brittney Moore. This MPH student just completed her first year in the Behavioral and Community Health program and found that she really loved the class Community Analysis and Ecology.

"In this course, we studied the ecological factors that contribute to health outcomes and what we can do as public health professionals to plan and create sustainable interventions with these factors in mind," she says. "I really enjoyed being able to incorporate my research interests into the coursework."

Meaghan Donewar, seen here with her study buddy, has really liked the classes where you work through the process of figuring out a Public Health problem and coming up with a solution. That might be why her favorite class is Advanced Community Analysis, Ecology, and Health Disparities here at LSU School of Public Health.

"Throughout the class we gained experience developing an intervention and evaluation plan then write a systematic review," she tells us. As for her latest class project? "I'm planning to submit for publication!"

Olivia Sugarman, Ph.D. student, tells us of her favorite class that "I hadn't decided if I was going to pursue a Ph.D. or not, but I quickly felt that for the first time, I was exactly where I was supposed to be at exactly the right time."

The class? Advanced Community Analysis, Ecology, and Health disparities. "I found that my professor, classmates, and I all cared deeply about public health, but were especially passionate about making sure communities were represented and invested in public health solutions," says Olivia.
